(54) DELIVERY DATE MANAGEMENT SYSTEM IN OVERSEAS PRODUCTION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a delivery date management system in overseas production which is enabled to manage the progress situation from ordering to delivery without obtaining confirmation from a variety of suppliers existing in between on every case when an orderer has ordered a product to an overseas production base.

SOLUTION: The delivery date management system KN in overseas production is provided with a domestic ordering sector (a production and distribution supplier terminal 10), an overseas production sector (a plant terminal 40), and a delivery division (a delivery center terminal 60), and also is provided with a management sector (a management sector server 30) for managing the whole system. The management sector receives product information associated with the product from the ordering sector and delivery date information being desired by the ordering sector, and manages the progress information ranging from the ordering of the product to the delivery to the ordering sector in the block through a network NW.
